

Responsible Business Communication

Enterprise peace of mind through compliant & secure communication solutions

Brief:

Gain full ownership of all of your business communications - anytime, anywhere, from any platform

The risks of non-compliance and losing ownership of critical data are growing. We provide enterprises with real-time visibility and complete control over client-facing business conversations.

Seamless communication between employees and clients, supporting individual, group and broadcast interactions, managed from a centralized platform. The platform is integrated with all major messaging platforms including WhatsApp, iMessage, Telegram, WeChat, Signal, and LINE, and telecom infrastructures for voice and SMS.

Communications Platform

Our Communications platform is a pioneering solution for compliant and secure communications between employees and clients across multiple messaging applications and voice channels. Through comprehensive data capture and unrivaled data security and control, enterprises can satisfy regulatory compliance obligations and meet strict governance policies.

This pioneering Federated Messaging Orchestration Platform also supports the creation and management of a Single Professional Identity - one phone number per employee used consistently across voice, SMS and messaging apps, and on business and personal devices, for secure, governed client communication.

API-based architecture enables easy integration with enterprise systems, applications, and processes. This includes archiving, security, monitoring and surveillance, CRM, and enterprise productivity and collaboration tools like Microsoft Teams and Slack.

About IPC:

A specialist technology and service leader powering global financial markets for over 50 years, IPC Systems is at the forefront of electronic trading connectivity and state-of-the-art cloud compliant communications, setting the standard for exceptional service, innovation, and expertise.

IPC's customer-first approach is bolstered by an extensive and diverse financial ecosystem that spans all asset classes and connects market participants anywhere in the world for enhanced communication, collaboration, and compliance. Global services include electronic trading, trading communications, and infrastructure-as-a-service solutions.
